**COMITS** feels proud to be the only digital-card manufacturer in Pakistan with state-of-the-art machinery working under a highly secured atmosphere. We manufacture a variety of card types from 300-micron thickness with a varnish finishing to 810-micron smart cards with lots in between! We are here to revolutionize the concept of cards by providing digitally printed, high quality cards of varying substrates catering to the unique and specific needs of every customer, be it schools, universities, banks, telecom sector or hotels.

**COMITS** envisions becoming not only a card-provider but also one stop solution for all your cards needs from manufacturing to distribution.

Our cliental reflect the quality of product we produce. It is matter of pride that we serve the top telecom companies of Pakistan for their Scratch-Cards needs. Our clients are the major retail businesses and we manufacture plastic-cards for their royalty and membership programs. Furthermore, We digitally manufacture photo-identification cards for various pharmaceutical companies and educational institutes.

## Why Use Plastic Card?

Now a day Plastic ID cards are necessary part of any corporate like you. Plastic cards are colorful, durable, small size, long-term, secure and rugged.

*Following are Some Key Benefit of Using Digital Plastic Cards.*

### Perfect Identification:

Plastic ID card having employ's photo, thumb impression, bar code, signature, makes perfect identification anywhere. By using such card, any employ of your corporate can be identified easily without any doubt and hesitation.

### Standardization:

Digital Plastic ID is another step towards standardization process. It improves your corporate image and standard by creating a healthy look of your organization.

### Employee's Attendance:

Plastic card will have **Bar Code** (Encrypted Unique Identity Number). Each employ will have to use this card and thumb impression for attendance purpose. This system will ensure presence of your all manpower.

### Enhanced Security:

Plastic ID card will improve your security system as well. It will restrict irrelevant people to enter certain premises. Plastic card has printed photo and thumb impression of employ and it is very hard to copy or duplicate it.

### Authorized Access:

You can make multiple groups of employees by using different colored Plastic ID cards and can define their roles and areas.

### Discipline & Respect:

Plastic ID card will display the Department and Designation of each employ. Everyone can see Department and Designation of the person without knowing him personally. Plastic ID cards will improve your discipline and formal ambience.

**Identification Cards.**

Identification card is an essential part of any organization. The type of card and its functions, integrity varies enormously. These cards contain basic identification information including a photograph of the cardholder, along-with their names, addresses, gender and date of birth. A microchip/barcode/magnetic strip/thumb impression would also hold important information, person's fingerprints or iris or facial scans, which are unique to the individual. Paper-printed cards have many problems like being rough, having risk of copying & duplication, lacking durability etc. Plastic cards are long-term cards, secure, rugged and durable. Our Plastic Cards can improve your identification system. It will help you standardize you.
